

# USED CATALYTIC CONVERTER RECYCLING FORM INSTRUCTIONS

1. Open the page [www.emission-partner.de/en/recycling](http://www.emission-partner.de/en/recycling)
2. Fill in the form with your **personal/company details**.
3. Please check one of **the three shipping options** under point 5 in the form:
  1. **Returns** by DHL
  2. **Collection**
  3. **Personal return**

**Free return shipment by DHL** for used catalytic converters weighing **up to 31.5 kg**:

1. Check „Return“ in the form
2. You can use the link in the form to open, fill in and print out the DHL returns form.

**Collection** of used catalytic converters with a weight **over 31.5 kg**:

1. Mark „Collection“ on the form and specify the desired collection date.
2. We will organize the collection for you and inform you of the collection date by e-mail.

4. Once you have completed the Altkat form, please print it out (CTRL + P) in landscape format and click on „Finish“.

Note: The form will not be sent to us until you click on „Finish“.

**Free return shipment by DHL** for used catalytic converters weighing **up to 31.5 kg**:

3. Pack used catalytic converters as a package for transportation.
4. Include the printed and completed used catalytic converter form in the package.
5. Stick the DHL return slip on the parcel.
6. Hand in the parcel at the DHL station.
7. Full payment. Shipping costs are covered by us.

**Collection** of used catalytic converters with a weight **over 31.5 kg**:

3. Attach old cats to pallet.
4. Add the used catalytic converter form to the pallet/used catalytic converter.
5. Freight forwarder collects the pallet.
6. The shipping costs of 45 € (up to 100 kg) or 85 € (from 100 kg) will be deducted from the payment.

5. The used catalytic converters arrive at our production facility and are inspected. You will then receive a credit note within the next 14 days. The amount depends on the precious metals still available.

**Fill in the form now!**

valid from 01.11.2022

The calculation is made after receipt and inspection of the old catalytic converter at the factory.

The calculation basis is the diameter. The credit note will be issued net.

**ATTENTION:** If there are no precious metals left in the catalytic converter, Emission Partner reserves the right not to pay out any compensation.

### Disposal costs of SCR & ALHS catalysts

2366 +2,00 € per liter

## Recycling of three-way catalysts/TWC

We will take back your three-way catalytic converter for recycling and you will receive a refund.

The calculation is made after receipt and assessment of the old catalytic converter at the factory.

In accordance with the Value Added Tax Act §13b paragraph 2 no. 7, the credit note will be issued without charging VAT.

### TWC catalytic converter coating

1375 -25,00 € per liter\*

\* The EUR 25 per liter is a guide value and the current rhodium and platinum prices must be taken into account.
